WEBSITE

City-scale 3D Model based Digital-Twin Service

- 3D Data Producer
- Digital Twin Service Provider
- Skyview Provider

Ministry of Land,
Infrastructure and Transport

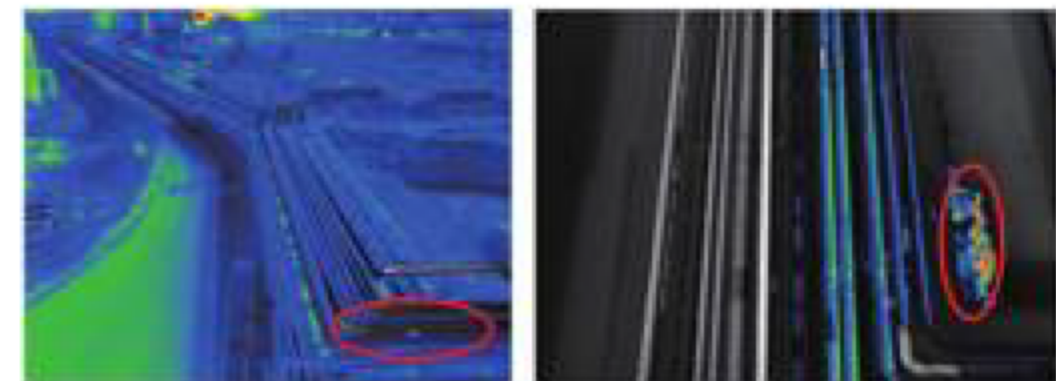

Services & Customers

3D-Model based Simulation Service

Counter-Terrorism Simulation Services

- Development of virtual simulations for city-scale scenarios using 3D terrains and building objects
- Establishing operational plans by pre-analyzing the internal structures of above-ground and underground facilities to identify escape routes and infiltration paths of terrorists

Long Distance Petroleum Facility Management

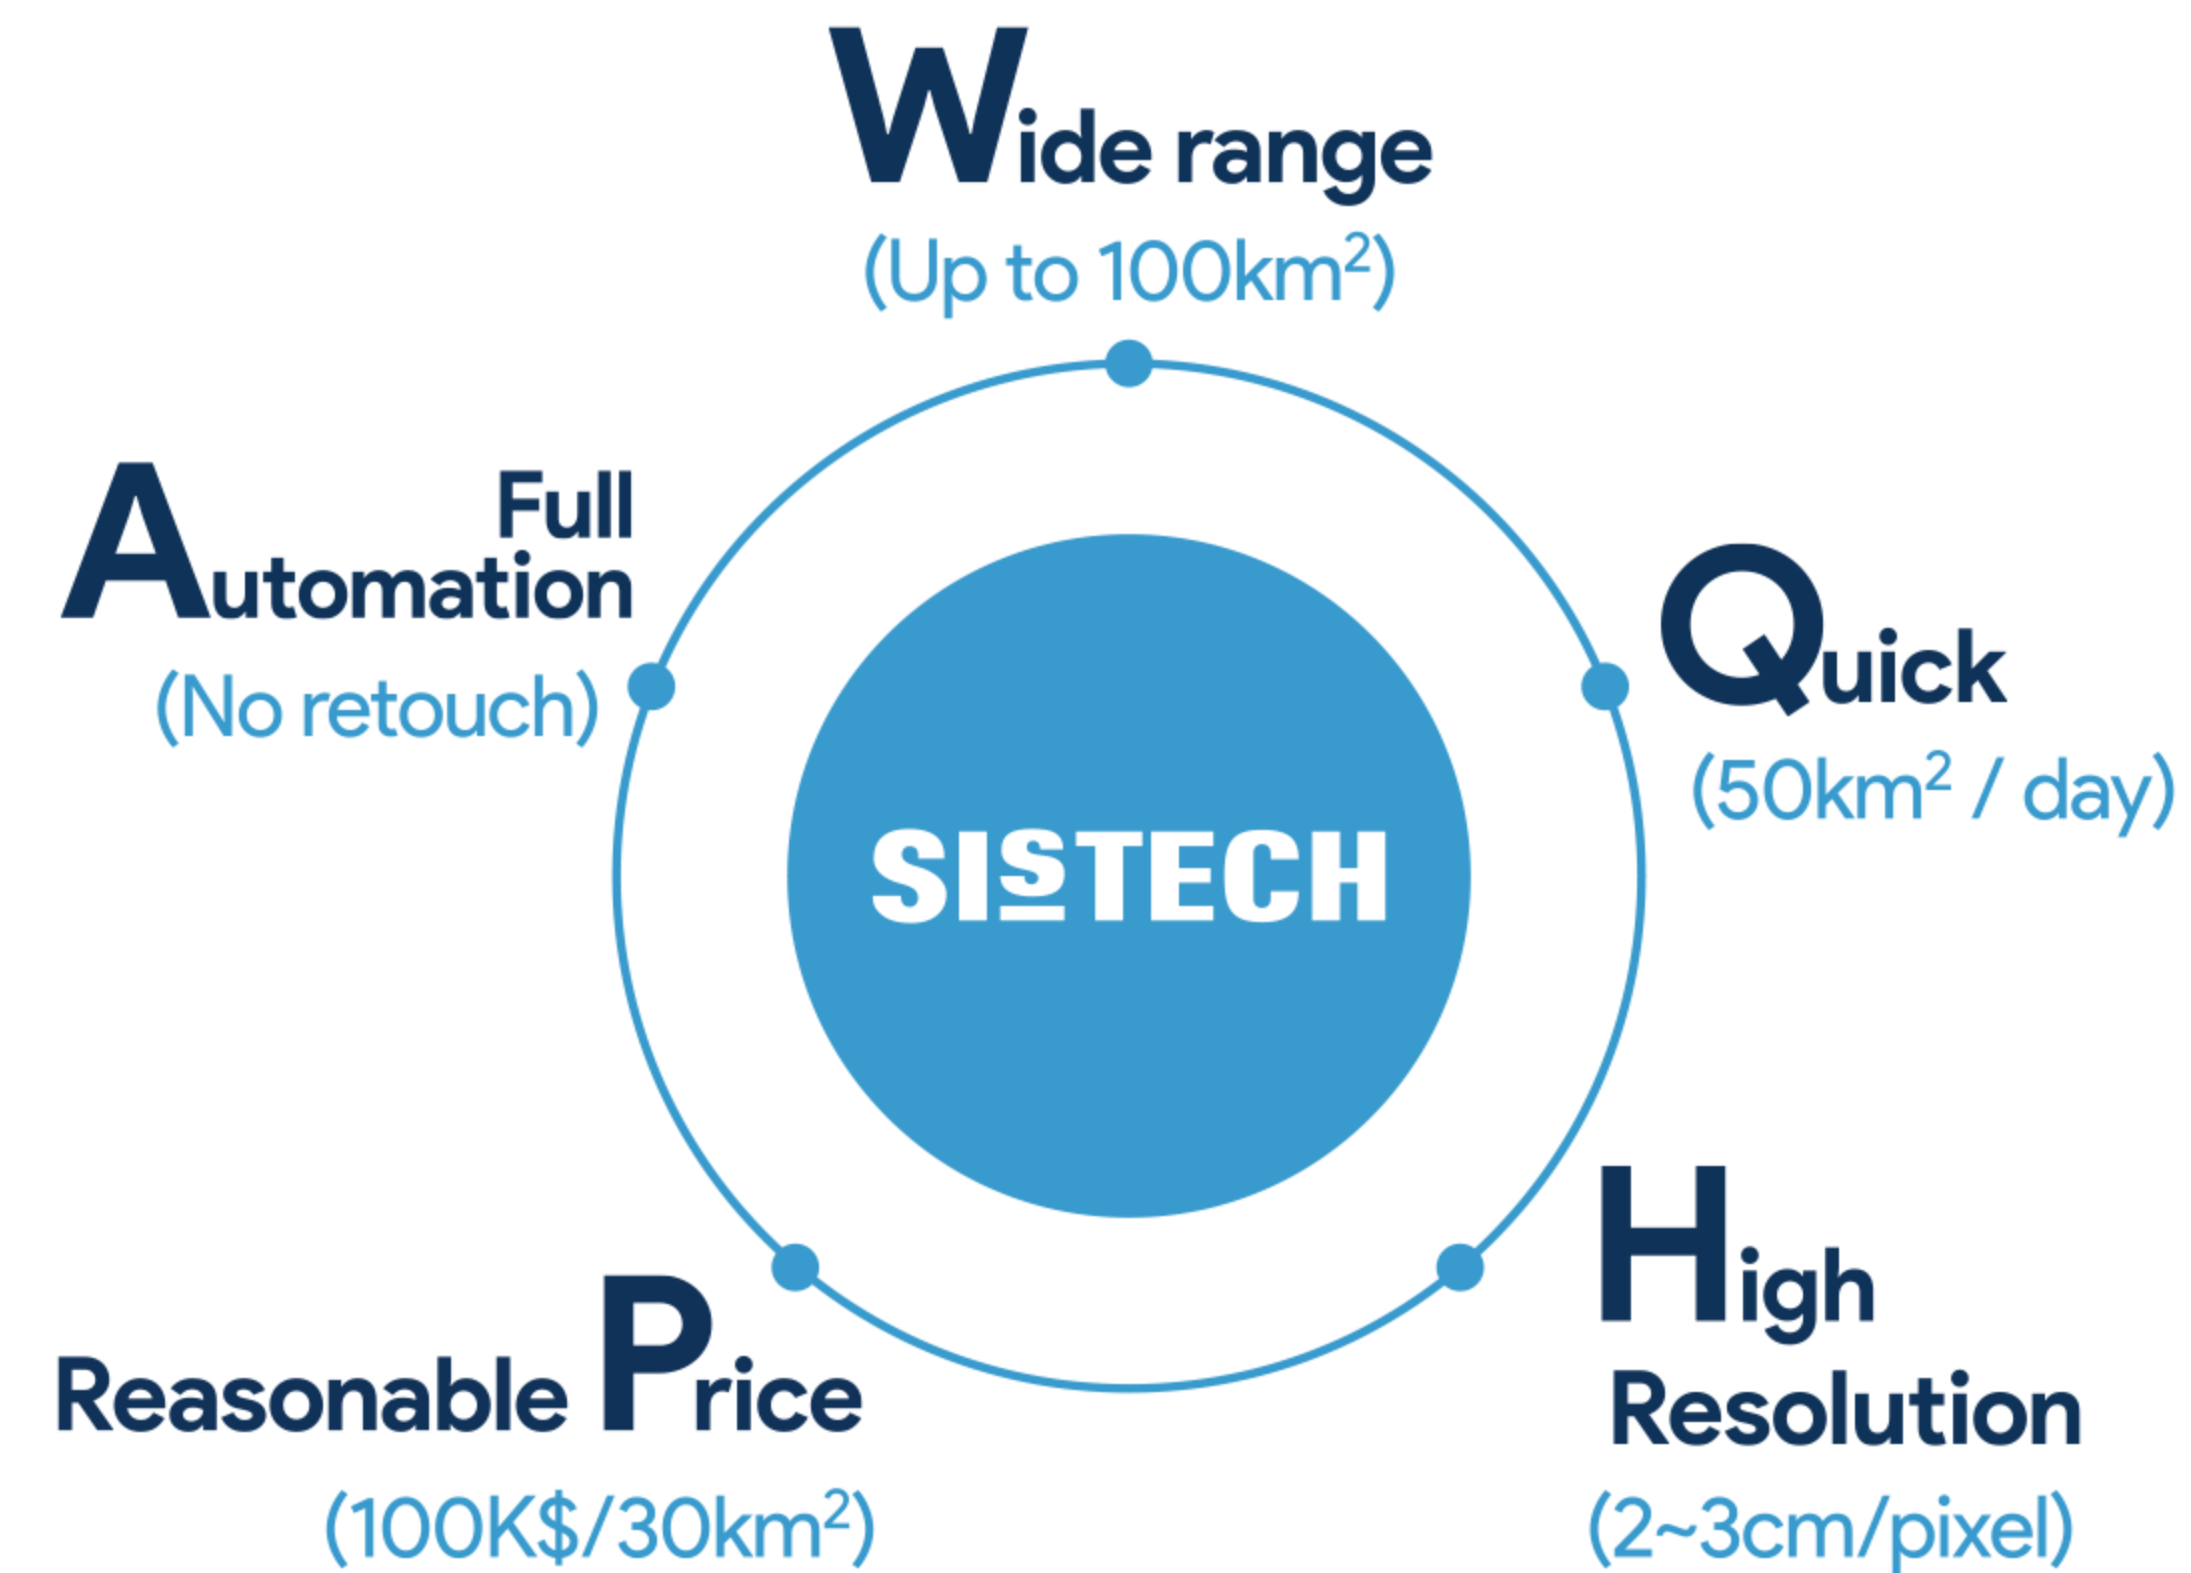

- Developed 3D-modeling technology to build 400km in a day
- 3D precision analysis technology
- Thermal imaging sensor analysis technology

3D Digital-twin Service for Local Government

- Digital twin for fire safety city
- 3D basemap for UAM GCS
- Services for Security of the VIP

Key Advantage

“ We can build
WIDE RANGE, HIGH RESOLUTION
3D-Modeling
QUICKLY and FULL AUTOMATED
at REASONABLE PRICE. ”

Core Technology

AI Pointcloud Segmentation Technology

AI Photo Data Pre-processing Technology

3D Geospatial Visualization

Drone self-develop & Manufacturing

Multi-Drone self-develop & Manufacturing
