High-Rate & Professional UAV Battery Solutions

### Company Profile

Founded in 2009 and located in Shenzhen, Guangdong Province, China, General Electronics Technology Co., Ltd. is a high-tech enterprise specializing in the research, development, production, and sales of FPV, DRONE and high-rate polymer lithium battery cells and packs with high voltage. The company boasts a highly qualified professional R&D team led by a battery expert who returned from the United States. The team possesses strong technical capabilities, bringing together numerous experienced engineers and professional product designers. We are equipped with advanced production and testing equipment and have a comprehensive product marketing and after-sales service management system. Furthermore, we will continue to uphold the philosophy of "customers world-wide," committed to providing high-value products, rapid delivery, strict quality control, and excellent customer service.

## Professional Drone Battery Solutions

**Product description**  
We specialize in high-performance drone battery customized services for 10 years, with deep expertise across various UAV and multicopter applications. Our dedicated engineering team designs and manufactures smart batteries for industrial, agricultural, and long-range missions, delivering safety and exceptional flight time to the global drone ecosystem.
